

Park Wins 2023 Innovation Days Award

Jason Park, M.D., Ph.D., won in the Medical Devices/Diagnostics Category at this year's UT Southwestern Innovation Days 2023 Pitch Competition held Wednesday, October 25. Dr. Park presented new technology for predicting immune-related adverse events (irAE) from immune checkpoint inhibitors.

The technology is the result of ongoing collaboration between UTSW and OncoSeer Diagnostics, Inc., developing multimarker blood tests that diagnose and predict immune related adverse events (irAE) in oncology patients undergoing immune checkpoint inhibitor (ICI) therapy.

UT Southwestern Innovation Days is an opportunity for UT Southwestern faculty, students, and staff to present their startups or early-stage technologies to leading investors, entrepreneurs, and representatives from the healthcare industry.

Last year there were 125 attendees including 60+ investors from across the state of Texas and nearly 25 investors from other states.
