

Postdoctoral Position to Study Cell Signaling Mechanism in Development and Regeneration

A postdoctoral training position is available in the laboratory of [Jin Jiang](#), in the Department of Molecular Biology at UT Southwestern Medical Center to study cell signaling mechanism in development and regeneration. [Our laboratory](#) has several exciting projects related to Hedgehog signaling in organ development, Hippo pathway in growth control and cancer, and intestinal stem cell self-renewal and regeneration in *Drosophila*.

Candidates must hold a recent Ph.D. and/or M.D. degree. Experience in in *Drosophila* genetics, molecular biology, cell biology, and biochemistry techniques leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Jin Jiang, Ph.D. Professor

UT Southwestern Medical Center

5323 Harry Hines Blvd.

Dallas, TX 753909148
