SPACE DESIGN GUIDELINES

Ι. **General Information**

- A. UT Southwestern Medical Center has created Space Design Guidelines of key spaces for use in planning and design by Architects/Engineers. These documents may be used as a basis of design or guide for typical size, orientation, needs assessments and indicate typical equipment requirements.
- B. These shall be utilized to start the conversation with user groups but do not remove the onus of design, collaboration, or coordination from the A/E.
- C. New spaces will be added, and previous spaces updated over time.
- D. For healthcare spaces, the A/E shall confirm with UTSW if a project is facility based or non-facility based to identify regulation and licensing requirements.

II. Administration and Core Spaces

Nursing Mother's Room	NM1 – NM6
Nursing Mother's Room – Individual	NMI1 – NMI6
III. Research and Education	
Rodent Holding – 4 Rack	RH4-1 – RH4-7
Rodent Holding – 6 Rack	RH6-1 – RH6-7
Rodent Procedure – Type A	RPA-1 – RPA-7
Rodent Procedure – Type B	RPB-1 – RPB-7
IV. Healthcare: Outpatient	
Audiology Booth	AB1 – AB9
Blood Draw Bay	BD1 – BD6
Blood Draw	B1 – B6
Cardiac Stress / Echo	CS1 – CS8
CT Suite	CTO1 – CTO12
CT Suite – Outpatient Procedure: See Inpatient CT Suite SDG	
Consult Room	CR1 – CR6
Exam Room	E1 – E6
UTSW Facilities Management Design Guidelines Space Design Guidelines	3 03/25/2022 (Re-Release 12/20/2024)

Exam – Double Sided	EX01 – EX06
Eye Lane	EL1 – EL6
Procedure Room	P1 – P6
Procedure Room with Toilet	PR1 – PR8
Ultrasound / Sonogram	US1 – US8
Reading Room	RR1 – RR7
Check-In	CI1 – CI9
Medication Room	MR1 – MR7
POC Lab	POC1 – POC8
Processing Lab	PL1 – PL8
Instrument Processing	IP1 – IP10
Soiled Hold	SH1 – SH6
Utility – Clean and Soiled	U1 – U8
Utility – Clean and Soiled with Pass Through	UP1 – UP8
/. Healthcare: Inpatient	

V. Healthcare: Inpatient

Cardiac Stress / Echo	CSI1 – CSI9
CT Suite (Inpatient and Outpatient Procedure)	CT1 - CT

Issue Date	Description	Editor
06/19/2020	June 19, 2020 Print	MDR
12/30/2020	Q4 2020 Revision, Addition of II. Space Exhibits with 10 new spaces	EV

DOCUMENT HISTORY

UTSouthwestern Medical Center Facilities Management

	-			Facilities Managem
Space: Nursing Mothers Room (Double)	Department:	General	Area: 132 SF	
Drawing: Room Isometric	Drawing Scale:	NTS	Last Update: 12/20/2024	1

Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

Space:	Nursing Mothers Room (Double)	Department:	General	Area: 132 SF
Drawing:	Floor Plan	Drawing Scale:	3/8" = 1'-0"	Last Update: 12/20/2024

Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Nursing Mother's Room with space for two occupants. Each curtain area will provide privacy for one person and includes dimmable light control for each occupant.

Privacy and locking requirements to be confirmed with User Group. Refer to Section 08 71 00 "Master Door Hardware Sets" for typical types. Multiple occupancy could have a keypad as standard.

UTSW Special Considerations:

Flooring: LVT

Base: Rubber Base

Ceiling: 2x2 ACT

Walls: Paint

Casework: Plastic Laminate, extend upper casework to ceiling grid

Countertops: Solid Surface

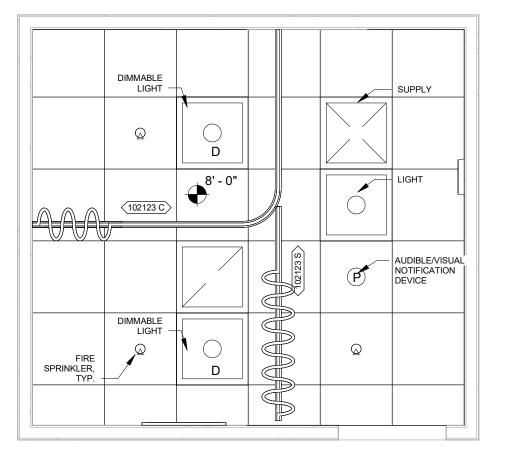

Blocking (BLKG) by GC shall be coordinated prior to installation.

Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

Space:	Nursing Mothers Room (Double)	Department:	General	Area: 132 SF
Drawing:	Reflected Ceiling Plan	Drawing Scale:	3/8" = 1'-0"	Last Update: 12/20/2024

Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical 2x2 ACT ceiling.

UTSW Special Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

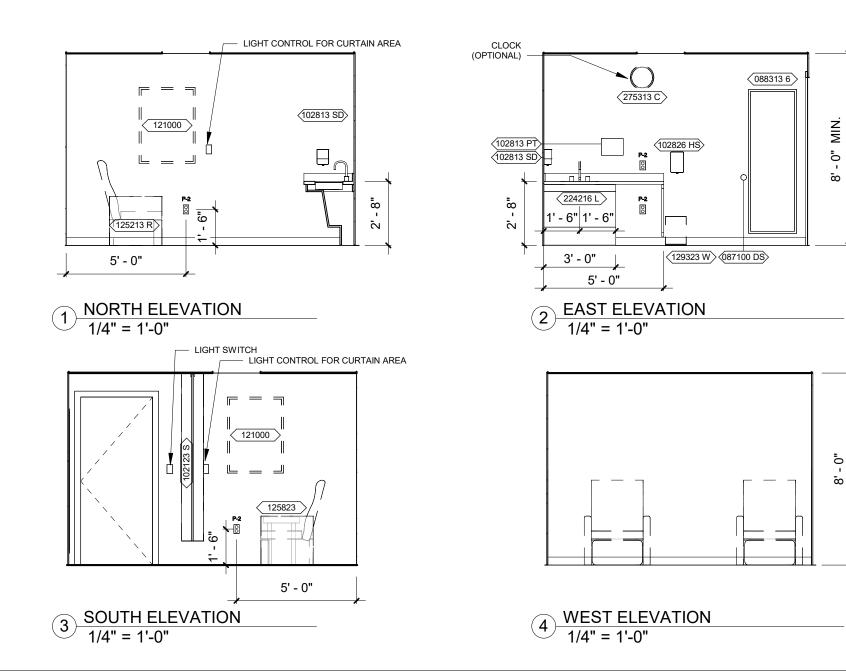

Lights within curtain area are preferred to be dimmable with wall switches as noted on the elevations. Confirm scope with UTSW PM.

Tracks shall be well supported above the ceiling.

PER PROJ. REQS.

Space Design Guidelines - Basis of Design

Space:	Rodent Housing - 4 Rack	Department:	Animal Resource Center	Area: 387 SF
Drawing:	Floor Plan	Drawing Scale:	1/4" = 1'-0"	Last Update: 12/20/2024

Space Narrative:

Information provided shall be confirmed with UTSW PM and ARC User Representative.

Furnish assignments shall be confirmed by the UTSW PM.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Refer to UTSW Design Guidelines including ARC Design Requirements for each project.

Spacing considerations shall include up to 6 racks in this space. Additional infrastructure shall reflect ability for growth.

UTSW Special Considerations:

Flooring: Seamless floor Options include: Epoxy and Quartz Resinous (confirm project requirements for specific type)

Base: 6" Coved, Integral

Walls: Epoxy Paint, non-toxic

Blocking (BLKG) by GC shall be coordinated prior to installation.

Door shall be self-closing with sound-attenuating properties including quiet closing, sound seals, tight fitting seals, and drop down door sweep. Doorway must provide for easy movement of carts. Confirm project requirements for diurnal light cycle adherence.

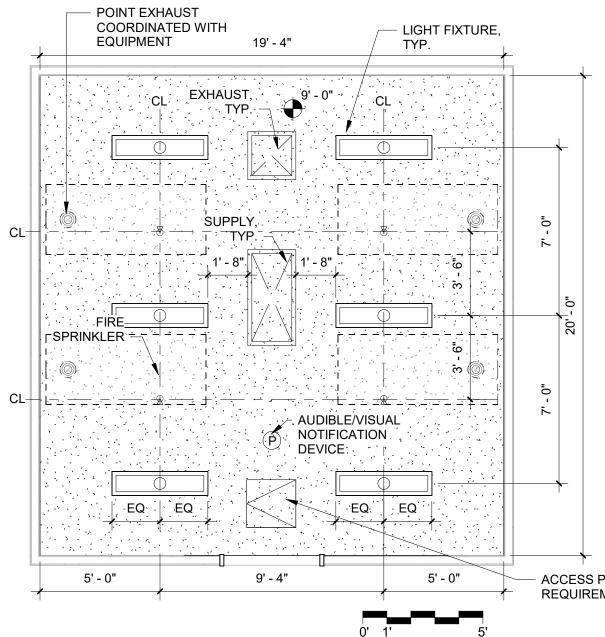

Confirm if project will provide Avidity System for: Data Management, Reverse Osmosis Auto Water, Stainless Steel Room Distribution System, Pressure Reducing Stations, and/or Pin Code Room Access.

Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

Space:	Rodent Housing - 4 Rack	Department:	Animal Resource Center	Area: 387 SF
Drawing:	Reflected Ceiling Plan	Drawing Scale:	1/4" = 1'-0"	Last Update: 12/20/2024

Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements. Rodent areas to have rodent friendly fire alarm systems.

Cementboard ceiling with epoxy paint.

UTSW Special Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project. Within animal areas, recessed fixtures shall have triple gaskets and lenses shall be smooth side out. Installation shall prevent the accumulation of dust.

Stainless steel access panels shall be located to easily service above ceiling components per project specific design. All shall be fully gasketed with hold-down clips.

Dimensions indicated are intended to show placement regularity. Actual project conditions may vary.

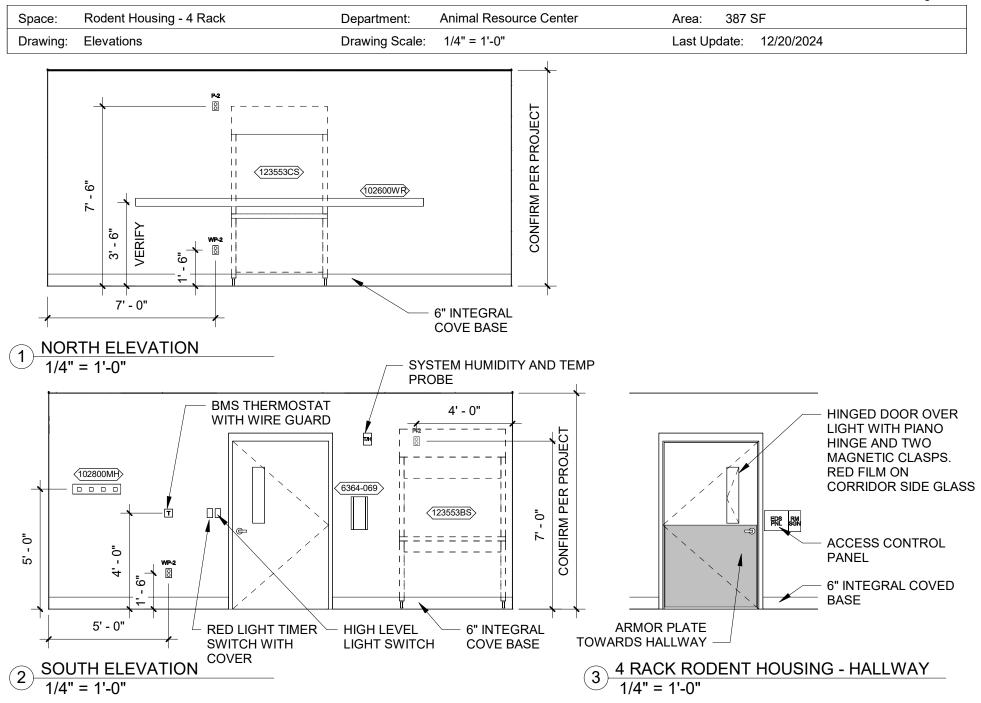

Confirm exhaust duct, animal watering, emergency power, and data requirements for animal housing racks and other equipment per project.

Coordinate exhaust with animal housing rack manufacturer. Infrastructure should include 4-inch diameter stainless steel ducts, escutcheon, and iris damper to interface with equipment.

Information provided shall be confirmed with UTSW PM. Furnish assignments shall be confirmed by the UTSW PM. Dashed equipment is specified per project by UTSW Items noted with symbol are shown on the Component Schedule

Refer to UTSW Design Guidelines including ARC Design Requirements for each project.

Procedure rooms must serve a variety of groups as well as multiple simultaneous teams. Flexibility and easy circulation are important considerations.

UTSW Special Considerations:

Flooring: Seamless floor options include: Epoxy and Quartz Resinous. Confirm type for project requirements.

Base: 6" Coved, Integral

Space Narrative:

Ceiling: Cementboard ceiling with epoxy paint

Walls: Epoxy Paint, non-toxic

Cabinets: Powder Coated Metal

Countertops: Stainless Steel

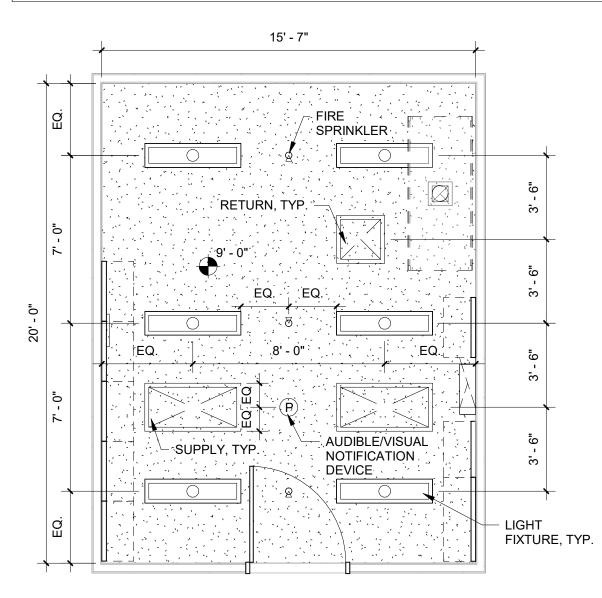

Blocking (BLKG) by GC shall be coordinated prior to installation.

Door shall be self-closing with sound-attenuating properties including quiet closing, sound seals, tight fitting seals, and drop down door sweeps. Doorway must provide for easy movement of carts.

Medical Center Facilities Management

Space Design Guidelines - Basis of Design

Space:	Rodent Procedure - Type B	Department:	Animal Resource Center	Area: 312 SF
Drawing:	Reflected Ceiling Plan	Drawing Scale:	1/4" = 1'-0"	Last Update: 12/20/2024

0' 1

Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements. Rodent areas to have rodent friendly fire alarm systems. Cementboard ceiling with epoxy paint.

UTSW Special Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project. Within animal areas, recessed fixtures shall have triple gaskets and lenses shall be smooth side out. Installation shall prevent the accumulation of dust.

Dimensions indicated are intended to show placement regularity. Actual project conditions may vary.

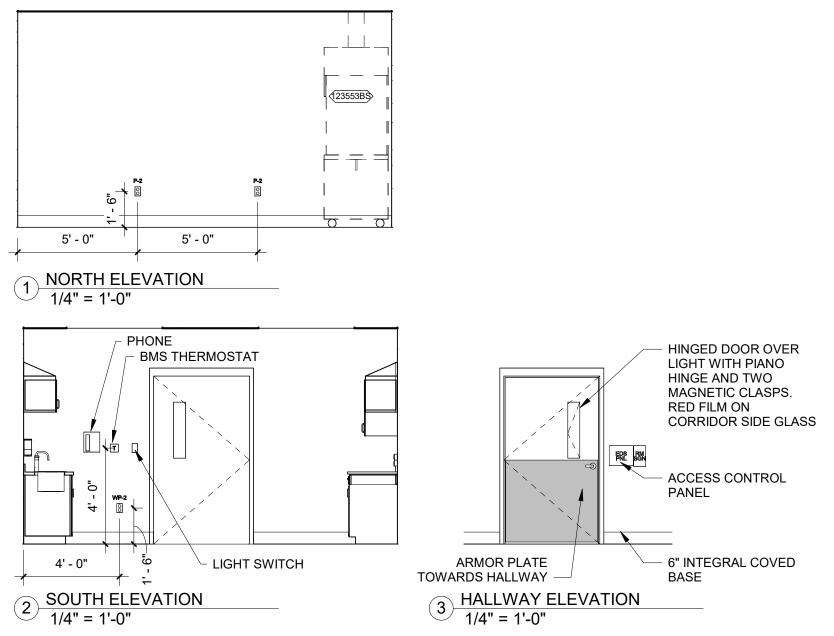

Stainless steel access panels shall be located to easily service above ceiling components per project specific design. All shall be fully gasketed with hold-down clips.

Confirm exhaust duct, power, and data requirements for user provided equipment per project.

Medical Center

Facilities Management

Space:	Audiology Booth	Department:	Outpatient	Area: 199 SF
Drawing	Space Notes	Drawing Scale:	NTS	Last Update: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW.

Items noted with symbol are shown on the Component Schedule.

Audiology booth BOD is for new construction. Booth model and sizes shall be determined per project requirements and with guidance from UTSW Audiology for determining acoustic criteria. Projects in existing construction shall be designed by AE to include ramping, raised floors and/or structural modification to best align with project goals and provide ADA/TAS compliance. In existing buildings, all utilities shall be verified and coordinated prior to final design of audiology booth.

A/E shall confirm with and receive approval from UTSW Audiology on STC requirements including partition construction, ceiling and slab considerations, adjacencies and location, as well as any shielding considerations. Proposed location shall be away from high traffic and noisy areas. All components of construction shall meet STC requirements to ensure the envelope meets sound booth manufacturer (mfr.) requirements and recommendations.

Coordination of utility requirements, size, location, slab elevation, door size/location, clearances, etc. shall be confirmed per final mfr's requirements. Careful documentation is needed to assist the general contractor and mfr's installer to ensure a coordinated installation and successful project.

Perimeter walls shall be to deck and in compliance with STC requirements including sound seals at penetrations and sound batt insulation within partitions. Doors shall have sound seals, closers, and elements to ensure acoustic envelope protects the quality of the installation.

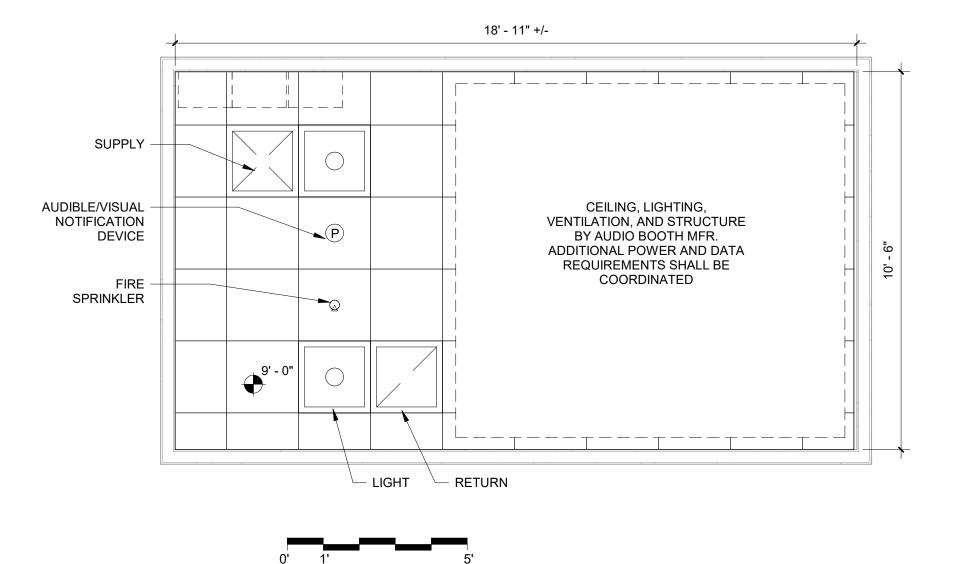

Fit-out and installation of control area shall be timed after the construction of the audio booth.

Sliding door unit shall provide acoustic control and seals to maintain required envelope. Minimum STC requirement for this door system shall be 34. Confirm for each project. If greater STC value is needed, provide specialty acoustic door to review with UTSW PM and users. Confirm with UTSW Audiology.

UTSW Special Plan Considerations: Flooring: Carpet Base: Rubber Base Ceiling: 2x2 ACT Walls: Paint Casework: Plastic Laminate, extend upper casework to ceiling grid Countertops: Solid Surface Blocking (BLKG) by GC shall be coordinated prior to installation. Audiology Booth finishes and elevations to be confirmed with mfr. Acoustically "softer" finishes are preferred to hard finishes that increase reverberation. Junction box, power and utilities to serve audiology booth to be coordinated in design by A/E and provided by GC. Add painted breakmetal panels to hide any gaps between walls, ceilings, and the audio booth.

Medical Center Facilities Management

Space Design Guidelines - Basis of Design

Medical Center

Facilities Management

Space:	Audiology Booth	Department:	Outpatient	Area:	199 SF
Drawing:	Space Notes - Ceiling	Drawing Scale:	NTS	Last Up	date: 12/20/2024

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical 2x2 ACT ceiling. Confirm CAC requirements per project.

UTSW Special RCP Considerations from OSBC:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project. Lighting in booth by audiology booth mfr.

Audiobooth shall have knockouts in the ceiling panel(s) for fire sprinkler pipe and fire sprinkler pipe specified. If the booth consists of single wall construction, the knockout would be in the single panel of the ceiling. If the booth utilizes double wall construction, the knockouts would be in both exterior and interior ceiling panels.

If booth manufacturer does not provide knockouts, ensure the booth manufacturer specifies the location of where to drill the hole(s) for fire sprinkler pipe during manufacture of the booth and the location is clearly marked upon delivery to owner.

Request stabilization bracket from the manufacturer for sprinkler pipe to be attached to the booth, if available.

Request a rubber coated pipe sleeve from the manufacturer to isolate sprinkler pipe from the booth, if available. If a pipe sleeve is unavailable, utilize acoustic caulk to seal the exterior booth ceiling penetration. The sprinkler pipe shall be centered in the hole and not touching the booth prior to caulking. The sprinkler pipe shall not be permitted to move in the hole or be permitted to touch the booth after caulk is applied.

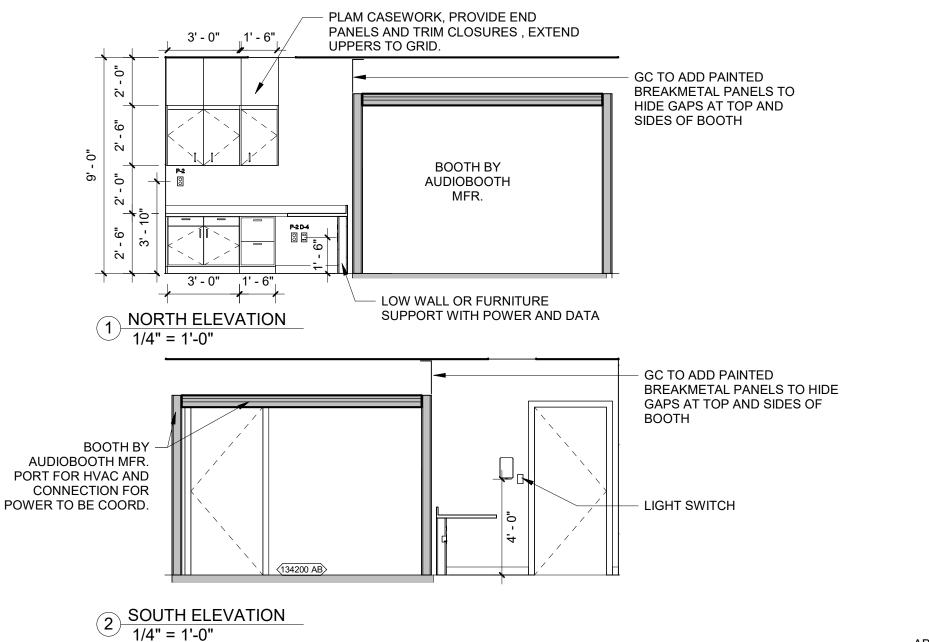

Flexible fire sprinkler pipe shall be required at the entry penetration to the booth. The mounting bracket (provided from sprinkler pipe manufacturer if unavailable from booth manufacturer) shall be utilized to allow the pipe to move with the booth ensuring physical and acoustic isolation.

A concealed fire sprinkler head shall be utilized.

For auditory brainstem response (ABR) testing or electroencephalogram (EEG) testing, non-ferrous fire sprinkler pipe shall be utilized to minimize radio frequency disturbance, similar to MRI suites. However, for audiometry, ferrous fire sprinkler pipe shall be permitted as radio frequency disturbance is not an issue.

Space:	Cardiac Stress / Echo (Cardiology)	Department:	Outpatient	Area: 255 SF
Drawing	: Space Notes	Drawing Scale:	NTS	Last Update: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

UTSW Special Plan Considerations:

Flooring: LVT

Base: Rubber Base

Ceiling: 2x2 ACT

Walls: Paint

Cabinets: Plastic Laminate, extend upper casework to ceiling grid

Countertops: Solid Surface

Blocking (BLKG) by GC shall be coordinated prior to installation.

Confirm crash cart requirements per clinic including location near-by room and emergency power.

Windows are not preferred. Provide black-out roller shades if windows are present. Discussion needed per project to confirm the needs for a nurse call station.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical ACT ceiling. Confirm NRC requirements with UTSW PM.

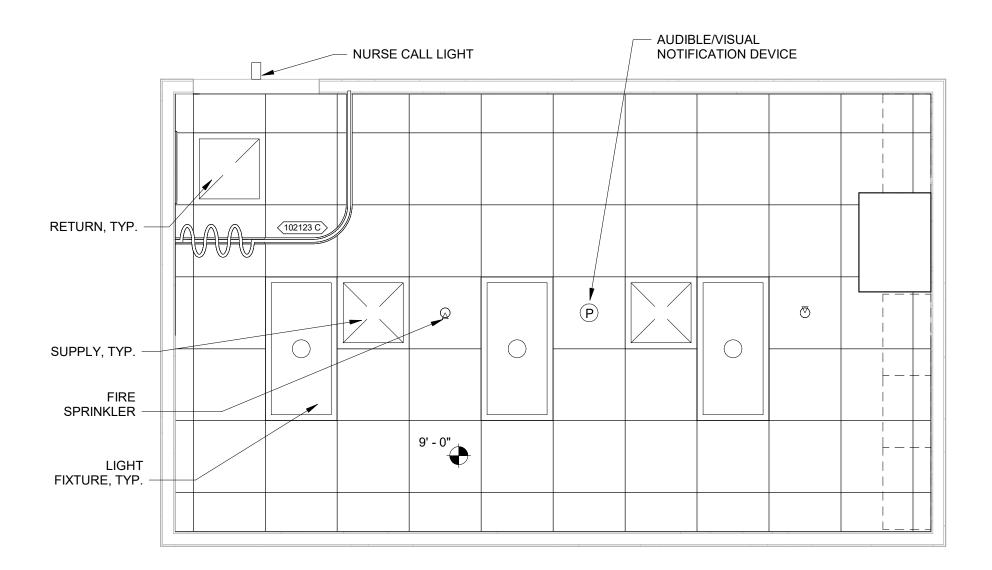

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

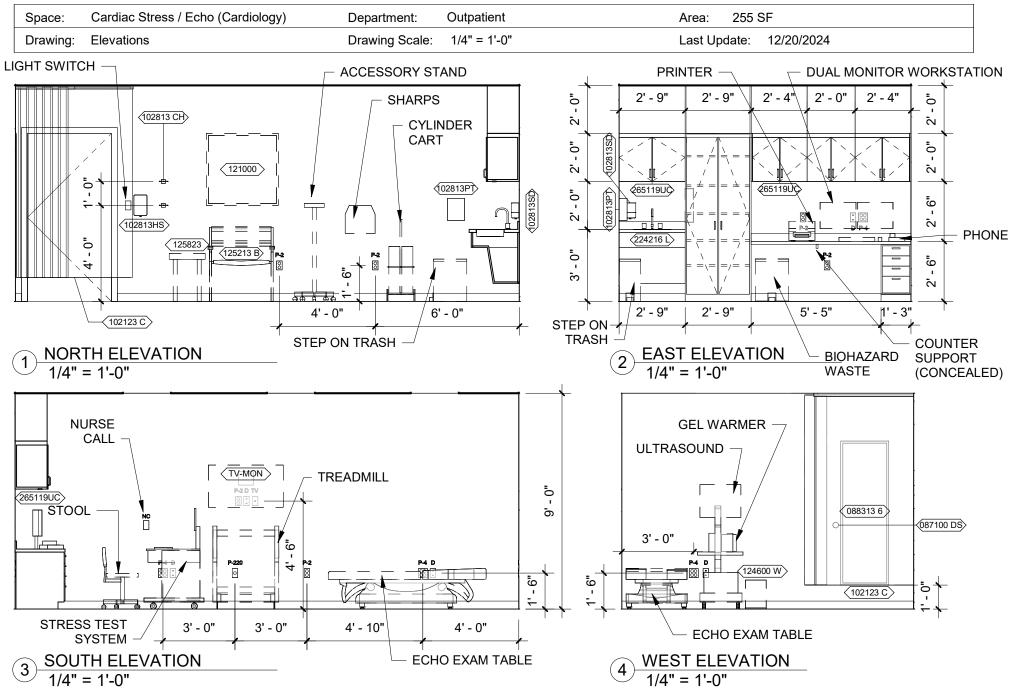

Fixtures shall be dimmable to provide full range from low light for exams to full light levels for cleaning.

Space Design Guidelines - Basis of Design

Space:	Cardiac Stress / Echo (Cardiology)	Department:	Outpatient	Area: 255 SF
Drawing:	Data/Power Schedule	Drawing Scale:	NTS	Last Update: 12/20/2024

Electrical Fixtures

USTW II	D Item	Qty.
P-2	Power - Duplex - 120 V	6
P-4	Power - Quad - 120V	4
P-220	Power - 220 V	1
	Data Fixtures	
UTSW ID	Item	Qty
D-2	Data- Qty 2	5
TV	Coaxial Cable (TV)	1

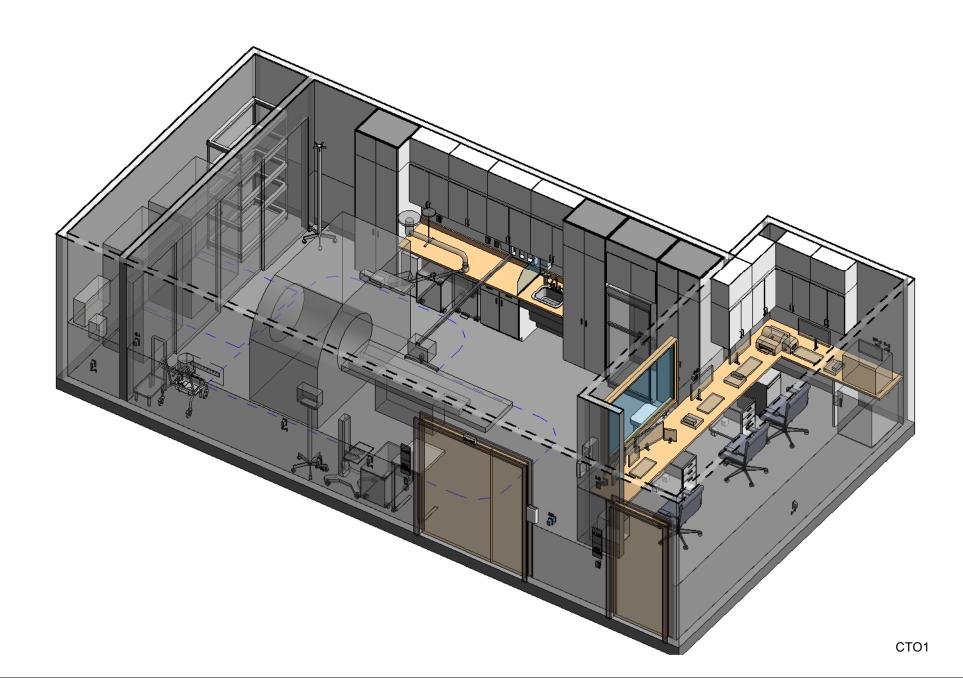

UTSW Special Considerations:

Per project, confirm special power requirements such as dedicated circuits for echo exam table and ultrasound.

For screen installations, each shall be ADA/TAS compliant. Options include providing just power and TV/coaxial cable or providing data as well. For installations with all three utilities, discuss providing recessed back-box to ensure installation is ADA/TAS compliant.

Facilities Management

Space Design Guidelines - Basis of Design

Space:	CT Suite (Outpatient Imaging)	Department:	Outpatient	Area:	575 SF
Drawing:	Space Notes - Part 1	Drawing Scale:	NTS	Last Upo	date: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

UTSW Special Plan Considerations:

Flooring: Welded Sheet Vinyl

Base: Welded Vinyl

Ceiling: 2x2 ACT

Walls: Wall Protection with Paint above, corner guards at all outside corners.

Cabinets: PLAM All cabinet doors and drawers to have locks.

Countertops: SS Solid Surface, Clear acrylic splash guard at sink CFCI, Provide solid support leg underneath medication dispensing units.

Windows: Windows between CT Control and the CT room shall provide privacy function. Utilize electronically switchable, X-ray shielded unit, or provide between glass integral blinds.

Door: Outpatient typically prefers an uneven pair door and a closer with hold open. Card reader usage is determined per project requirements.

Blocking (BLKG) by GC shall be provided for all wall-mounted equipment and coordinated prior to IFC.

GC shall run conduit from the Data-H to Data-U for vitals connection to Epic at workstation, if present.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Final layouts of access panels shall provide easy access to items with maintenance requirements.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Fixtures shall be dimmable in both CT and CT Control to provide full range from low light to full light levels. Undercounter lights to be dimmable with control located at the counter.

Provide structural design and support for all ceiling mounted equipment.

UT Southwestern Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

	Space:	CT Suite (Outpatient Imaging)	Department:	Outpatient	Area:	575 SF
ſ	Drawing:	Space Notes - Part 2	Drawing Scale:	NTS	Last Up	date: 12/20/2024

Space Considerations:

The CT room size and configuration shall be based on the minimum requirements for the project specific equipment and usage requirements. Design shall ensure required access areas, work zones, and clearances are provided for all equipment and processes. Discuss preferences for utilities. Independent chiller supply preferred for imaging equipment.

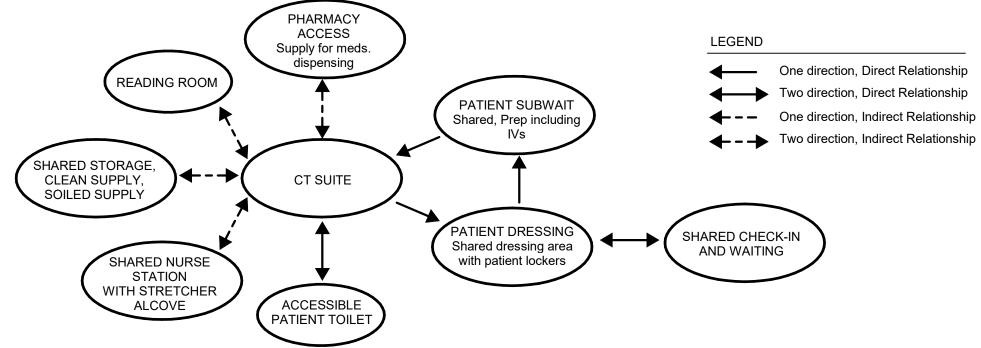

Layout shall ensure easy and safe movement for patients and providers. Where infrastructure allows, provide ceiling mounted patient lift. Document accessory equipment space needs, storage requirments, and work areas for the project.

Confirm:

- Utilities requirements including emergency power and dedicated circuit needs.
- Emergency notification system utilized: CDAS, RTLS.
- Door Requirements: Hardware and door types.
- Access Control: Clinic strategy and infrastructure.
- Computer system quantities, accessories, and requirements.
- Storage requirements including ancillary spaces, millwork, and mobile pedestal quantities.
- Structural requirements and constraints.

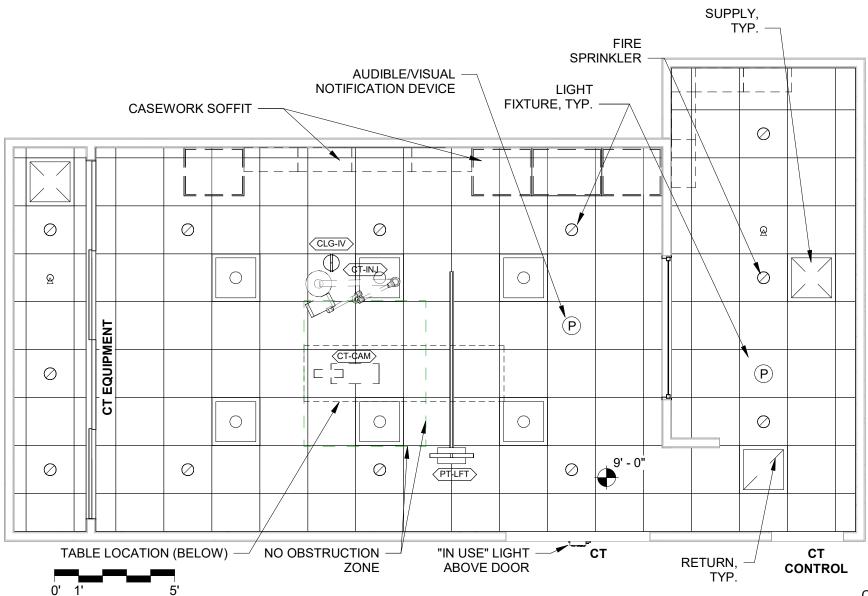

Space Relationship Considerations:

Confirm and discuss space relationships per project. Potential related spaces and relationships identified in diagram.

UTSouthwestern Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

Space: Ultrasound/Sonogram (OBGYN, Maternal Fetal Med)	Department:	Outpatient	Area: 233 SF
Drawing: Space Notes	Drawing Scale:	NTS	Last Update: 12/20/2024
Plan Space Narrative:			
Information provided shall be confirmed with UTSW PM.			
Furnish assignments shall be confirmed by the UTSW PM. Entity requirements.	y furnishing paper	towel and soap dispens	sers shall be confirmed per project location and lease
Dashed equipment is specified per project by UTSW			
Items noted with symbol are shown on the Component Schedule			
Toilet may not be incorporated into all planned spaces. Confirm v	with UTSW PM.		
JTSW Special Plan Considerations:			
Flooring: LVT TLT: Tile *Provide smooth flooring transiti	on without lip or r	aised strip	
Base: Rubber Base TLT: Tile			
Ceiling: 2x2 ACT TLT: Gypsum, epoxy paint			
Walls: Paint TLT: Tile, Epoxy paint			
Casework: Plastic Laminate, extend upper casework to ceiling gr	rid.		
Countertops: Solid Surface			
Blocking (BLKG) by GC shall be coordinated prior to installation.			
GC shall run conduit from the Data-H to Data-U for vitals connect	tion to Epic at wor	kstation, if present.	
Provide black-out roller shades if windows are present.			
RCP Space Narrative:			
Fire and life safety elements will be designed and laid out per pro	ject requirements		
Final layouts of access panels shall provide easy access to items	with maintenanc	e requirements.	
Ultrasound room will have 2x2 ACT ceiling and gypsum in the toil	et room.		
JTSW Special RCP Considerations:			

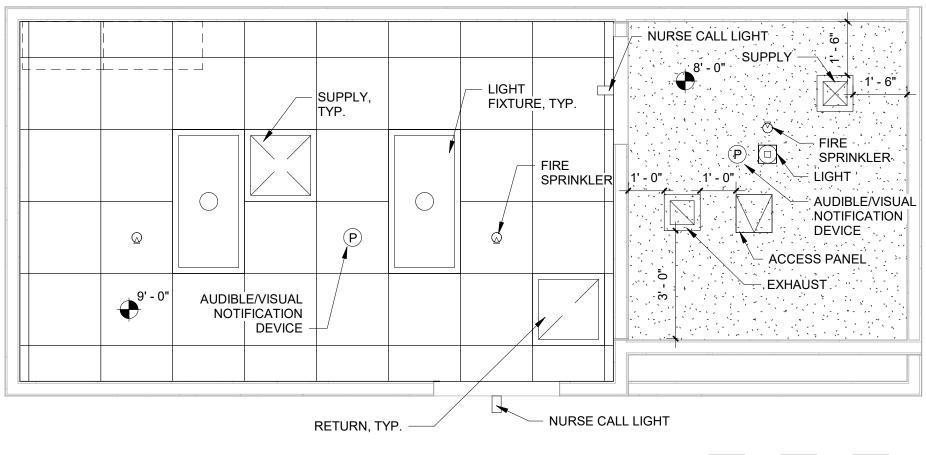

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Fixtures shall be dimmable to provide full range from low light for exams to full light levels for cleaning.

Nurse call stations from both toilet room and patient area shall drive the corridor light as well as activiate an indication at the nurse console.

Facilities Management

Space Design Guidelines - Basis of Design

Space:	Reading Room (Imaging)	Department:	Outpatient	Area: 183 SF
Drawing:	Space Notes	Drawing Scale:	NTS	Last Update: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Imaging leadership must review and approve reading room plans and components for each project throughout Design and Documentation. Additional approvals shall be confirmed per project. Mammogram reading rooms must be approved additionally by UTSW Medical Physicist.

Clinic size will determine the number of reading stations. Smaller clinics may have workstations within private offices with privacy panels between workstations.

Reading room finishes and furniture will promote a quiet and dark space. Elements of a reading station will be the same when located within an office with a separate desk.

Specific furniture sizes and components will be confirmed for each project.

Square footage indicated for 2 cubicles plus walk aisle.

Spaces with reading room cubicles located within will require card/badge access.

UTSW Special Plan Considerations:

Flooring: CPT

Base: Rubber base

Ceiling: 2x2 ACT

Walls: Paint, Neutral dark color.

Blocking (BLKG) by GC shall be coordinated prior to installation. Blocking required behind all slat wall.

Windows: Windows and natural light are not preferred. If present, glazing shall be walled off or a black-out film installed.

Systems: A dediated thermostat for the reading room areas is preferred.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical 2x2 ACT ceiling.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Lights and Controls: Typical light for this space will have 2'x2' LED lights located over the reading stations with LED can lights located over the walkways. Standard practice is for the lights to be turned off over desks during working hours while walkway lights remain on. The walkway lights to be LED non-reflective cans that are dimmable to 1 percent.

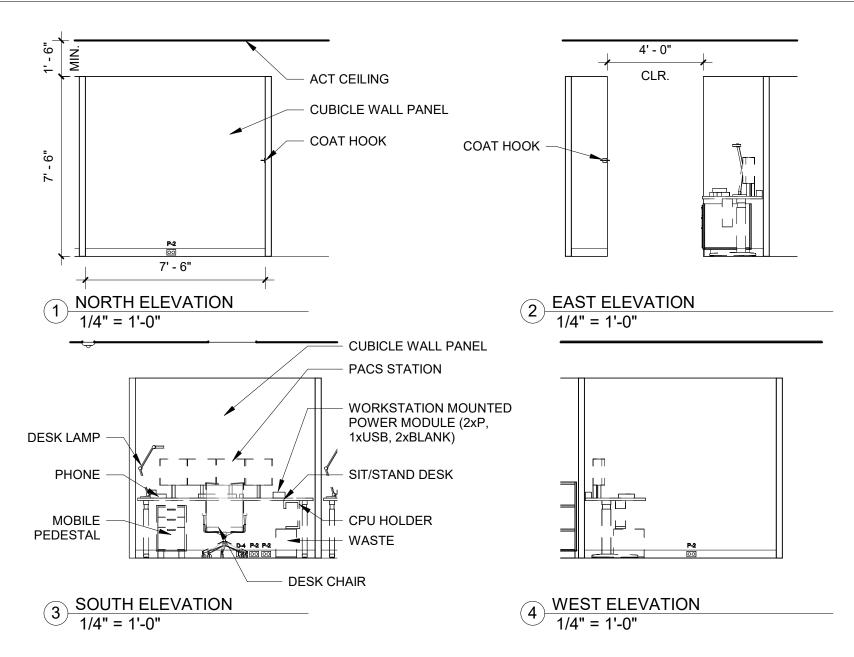

WAP locations shall be confirmed per project requirements and identified on RCPs.

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Refer to Data/Power Schedule page for additional requirements including BCA Laptop.

The number of check-in desks in a project shall be determined by the expected patient volume per clinic. Where required, 90 degree counter supports shall be located to prevent knee interference.

Quantity, types, and locations of guest chairs may vary per clinic, confirm per project.

Confirm if check-in area needs a nearby workstation for leadership. This single workstation should be located in close proximity to the check-in area but may be off-stage. Provide a desktop computer with 2 monitors and phone.

Equipment Notes:

Welcome tablets are used at some clinics which require a charging station within a locking cabinet. The locking cabinet shall be secured to the counter if in an open space. Each tablet charging station holds 10 tablets. Each check-in desk will need 2 to 3 tablets. Adjust charging station quantities to provide for the total tablets required.

Printers: Confirm if clinic will utilize a multi-function document printer and required quantity. Floor mounted multi-function printers may be off-stage and out of patient view. Additional printer types includes: chart printers, label printers, and arm band printers.

Confirm if clinic will be accepting cash and what requirements will be to determine if drop safe or individual locking drawers shall be necessary.

Confirm requirements for security cameras and duress buttons.

UTSW Special Plan Considerations:

Flooring: Carpet

Base: Rubber Base

Ceiling: 2x2 ACT and Painted Gypsum

Walls: Paint

Cabinets: Plastic Laminate or High Impact Panels, confirm per project.

Countertops: Solid Surface

Blocking (BLKG) by GC shall be coordinated prior to installation.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical 2x2 ACT ceiling and Painted Gypsum.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Data / Power Requirements:

Confirm requirements for number circuit, emergency power, quantities, and layouts per project.

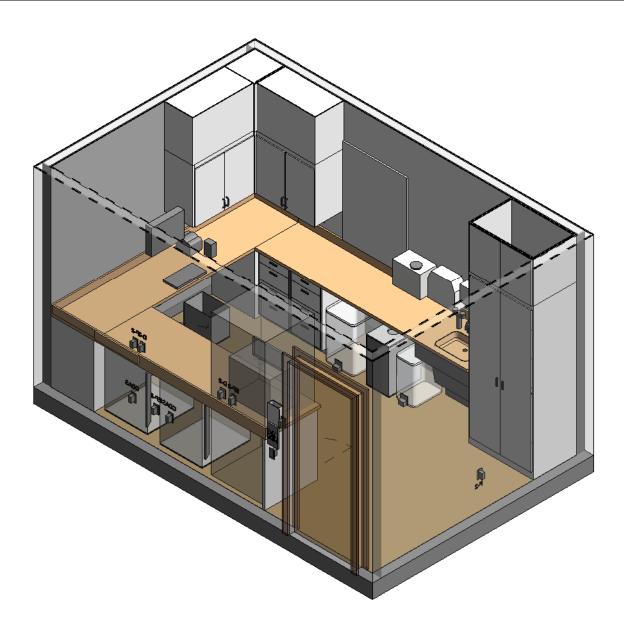

Data for workstation computers connects to the network through the phone.

Busincess Continuity Access (BCA) Laptop requires a direct connection to a network printer with both connected to emergency power. If the project does not have emergency power, provide a large battery backup to serve both items. The battery backup can be unsightly so the location shall be well coordinated and clearly documented.

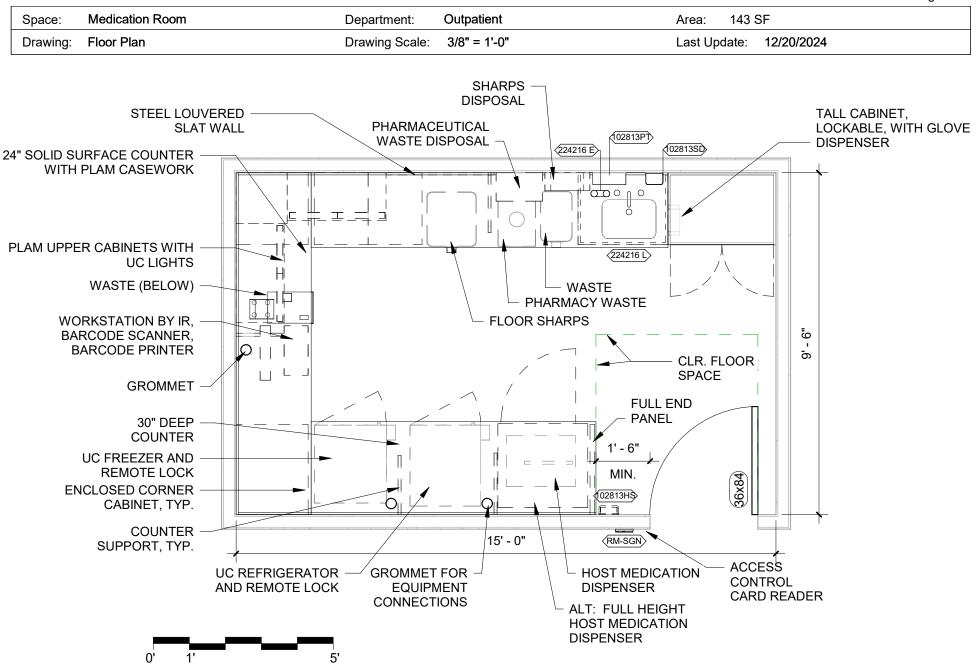

Confirm if the clinic will require an outbound fax with additional phone/data connections.

Space Design Guidelines - Basis of Design

Space:	Processing Lab	Department:	Outpatient	Area: 12	21 SF
Drawing:	Space Notes	Drawing Scale:	NTS	Last Update	e: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Location of sharps container shown in this guideline shall be reviewed and approved by HSA (Health Systems Affairs)

Confirm requirements for emergency power or back-up power. Refrigerator requires CDAS and back-up power.

UTSW Special Plan Considerations:

Flooring: LVT Base: Rubber Base Ceiling: 2x2 ACT Walls: Paint Casework: Plastic Laminate, extend upper casework to ceiling grid Countertops: Solid Surface Blocking (BLKG) by GC shall be coordinated prior to installation.

RCP Space Narrative:

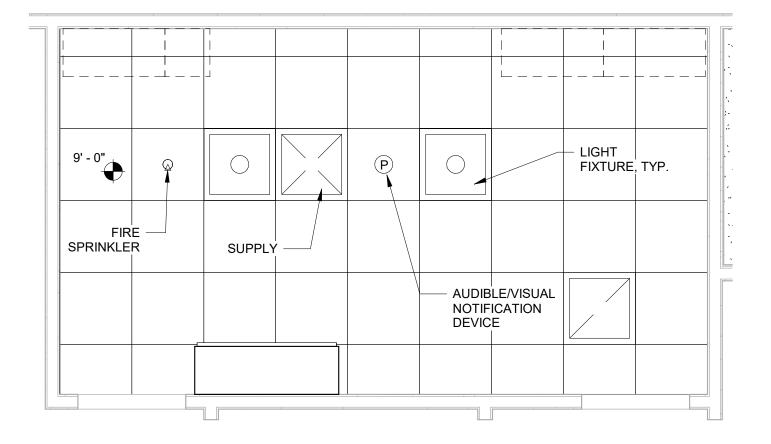

Fire and life safety elements will be designed and laid out per project requirements. Typical 2x2 ACT ceiling.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Facilities Management

Space Design Guidelines - Basis of Design

Space:	Instrument Processing	Department:	Outpatient	Area: 540 SF
Drawing:	Space Notes	Drawing Scale:	NTS	Last Update: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

Location of sharps container shown in this guideline shall be reviewed and approved by HSA (Health Systems Affairs)

UTSW Special Plan Considerations:

Flooring:	Sterile:	Ероху	Decontamination:	Ероху
Base:	Sterile:	Epoxy, Coved	Decontamination:	Epoxy, Coved
Ceiling:	Sterile:	GYP, Epoxy Paint	Decontamination:	GYP, Epoxy Paint
Walls:	Sterile:	Epoxy Paint	Decontamination:	Epoxy Paint
Casework:	Sterile:	Plastic Laminate	Decontamination:	Stainless Steel
Countertops	Sterile:	Solid Surface	Decontamination:	Stainless Steel

Blocking (BLKG) by GC shall be coordinated prior to installation.

Requirements for space, MEP and finishes shall comply with the Association for the Advancement of Medical Instrumentation (AAMI) and FGI, as confirmed by UTSW User Representative and UTSW PM.

Mechanical, ventilation and exhausting requirements shall comply with AAMI, including temperature and humidity ranges. Clean room to have positive pressure, decontamination room to have negative pressure and to be exhausted outdoors. Pass-through cabinet shall maintain pressure requirements.

Drawing shows 3-sink stainless steel decontamination unit but 2 sinks may be appropriate dependent on specific project requirements. Unit shall include sprayers and other standard components.

Water quality serving the space shall be investigated to confirm correct processing required to maintain equipment.

Floors shall have minimum 1/8" per 12" slope to drain.

For any project that requires the use of carts, confirm requirements for providing cart wash at the facility.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Gypsum ceiling with all fixtures flush and enclosed. Access panels shall be located to easily service above ceiling components per project specific design.

Lighting levels shall meet or exceed IES recommendations for work areas.

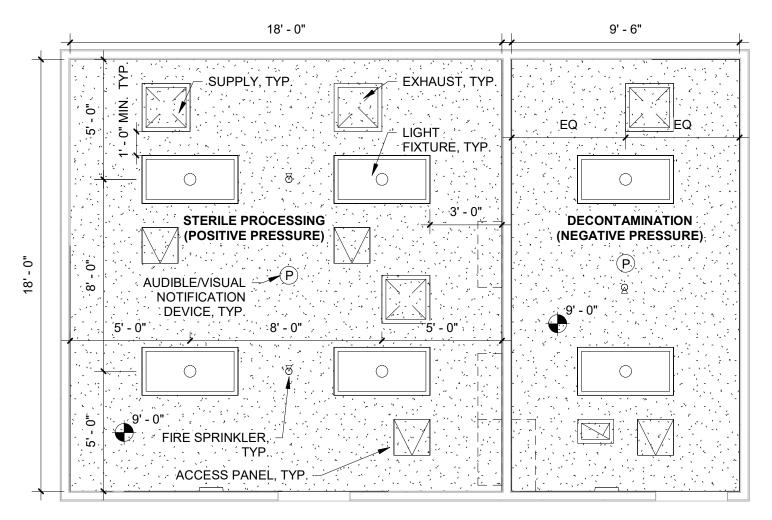

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Under cabinet lights at upper cabinets.

Blocking (BLKG) by GC shall be coordinated prior to installation.

Access control card readers at each door.

Refrigerator or other equipment such as blanket warmer may be required per project. Confirm per project by UTSW PM and Clinic Representative including requirements for emergency power, temperature control, etc.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

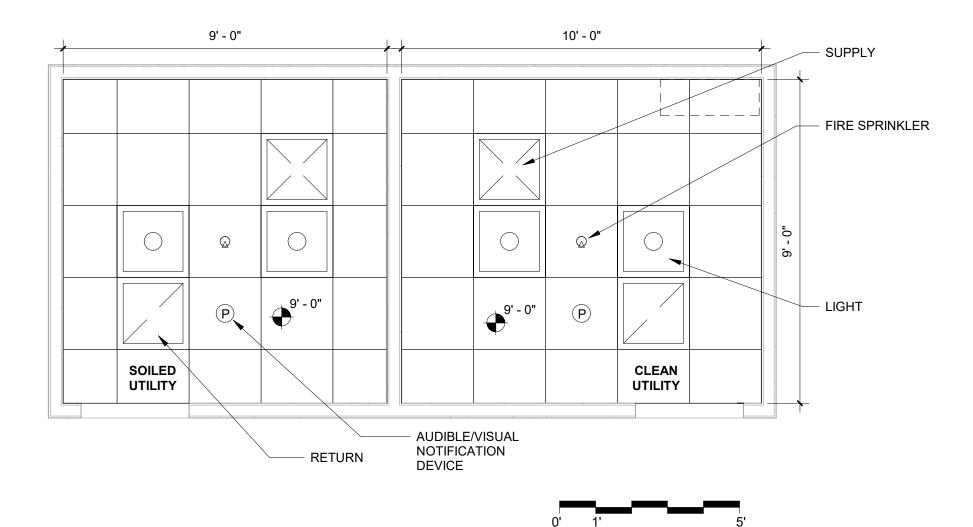

Typical 2x2 ACT ceiling.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

CVIR - Cardiovascular Interventional Radiology

Codes and Regulations:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

UTSW Special Plan Considerations:

Flooring: Seamless Flooring such as Sheet Vinyl with welded seams

Base: Coved

Ceiling: 2x2 ACT

Walls: Paint

Cabinets: Plastic Laminate, extend upper casework to ceiling grid. All cabinets to have locks. Confirm digital options.

Countertops: Solid Surface Sink: Drop-in Stainless Steel

Blocking (BLKG) by GC shall be coordinated prior to installation.

Confirm crash cart requirements per clinic including location near-by room and emergency power.

Exterior windows are not preferred. Provide black-out roller shades if windows are present.

Discussion needed per project to confirm the needs for a nurse call station.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Typical ACT ceiling. Confirm NRC requirements with UTSW PM.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Fixtures shall be dimmable to provide full range.

Discuss with user group how light fixtures will be zoned and switched into groups. Confirm with user group if each 2x4 exam lights should be switched separately. Discuss best locations for lighting controls to ensure patient safety and provider usage.

Space Design Guidelines - Basis of Design

Space: CT Suite (Inpatient Imaging / Outpatient Imaging Procedure)	Department:	Inpatient, Outpatient	Area: 750 SF
Drawing: Space Notes - Part 1	Drawing Scale:	NTS	Last Update: 12/20/2024

Plan Space Narrative:

Information provided shall be confirmed with UTSW PM.

Furnish assignments shall be confirmed by the UTSW PM. Entity furnishing paper towel and soap dispensers shall be confirmed per project location and lease requirements.

Dashed equipment is specified per project by UTSW

Items noted with symbol are shown on the Component Schedule

UTSW Special Plan Considerations: Flooring: Welded Sheet Vinyl or Resinous Floor Base: Integral, Coved, Match Flooring Ceiling: 2x2 ACT Walls: Wall Protection with Paint above. Cabinets: PLAM All cabinet doors and drawers to have locks. Countertops: SS Solid Surface, Clear acrylic splash guard (CFCI). Locate to accomodate accessories and user requirements. Blocking (BLKG) by GC shall be provided for all wall-mounted equipment and coordinated prior to IFC. GC shall run conduit from the Data-H to Data-U for vitals connection to Epic at workstation, if present.

RCP Space Narrative:

Fire and life safety elements will be designed and laid out per project requirements.

Final layouts of access panels shall provide easy access to items with maintenance requirements.

UTSW Special RCP Considerations:

Refer to UTSW Design Guidelines to confirm light fixture types appropriate per project.

Fixtures shall be dimmable to provide full range from low light to full light levels.

UT Southwestern Medical Center

Facilities Management

Space Design Guidelines - Basis of Design

Space: CT Suite (Inpatient Imaging / Outpatient Imaging Procedure)	Department:	Inpatient, Outpatient	Area: 750 SF
Drawing: Space Notes - Part 2	Drawing Scale:	NTS	Last Update: 12/20/2024

Space Considerations:

The CT room size and configuration shall be based on the minimum requirements for the project specific equipment and usage requirements. Design shall ensure required access areas, work zones, and clearances are provided for all equipment and processes.

Layout shall ensure easy and safe movement for patients and providers. Where infrastructure allows, provide ceiling mounted patient lift. Document accessory equipment space needs, storage requirements, and work areas for the project.

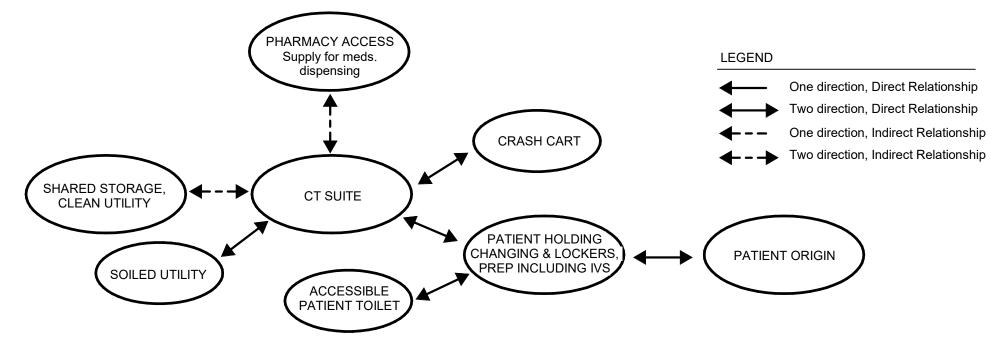

Confirm emergency power locations and emergency notification systems (CDAS or RTLS). Discuss requirements for dedicated circuits.

Confirm locations for card readers and door hardware needs. Doors are typically equal pair doors into the CT suite with card readers on all entry points.

Confirm amount of computers, monitors, phones, and accessories required on the Control room work surface. Mobile pedestal quantities to be confirmed per project. Provide upper cabinets for storage.

Design Considerations:

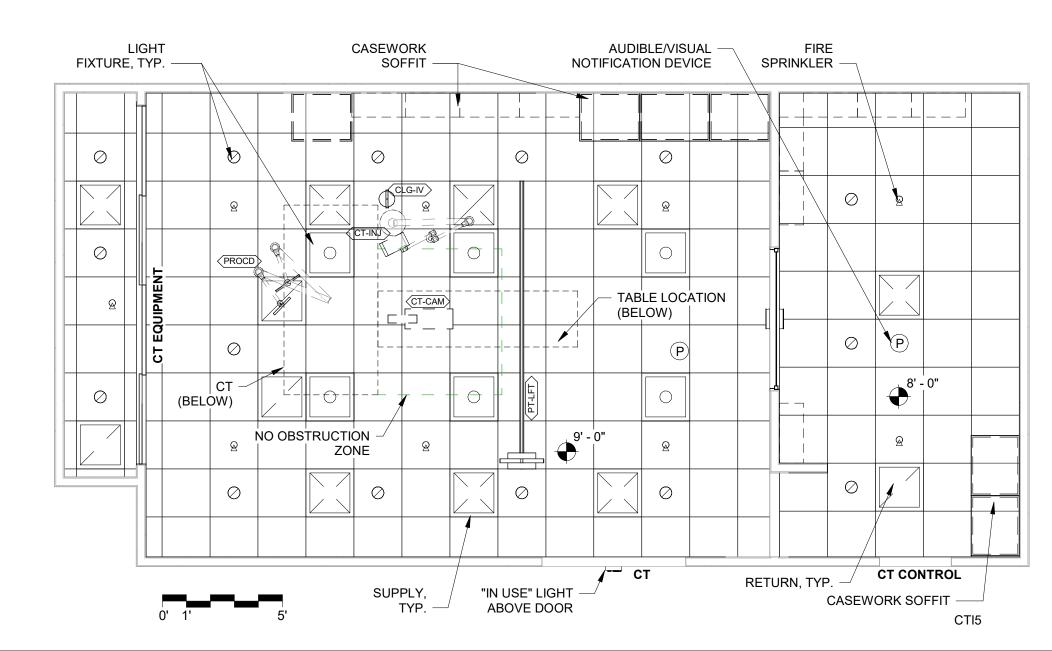

Confirm space relationships, connections, and traffic patterns per project.

Medical Center Facilities Management

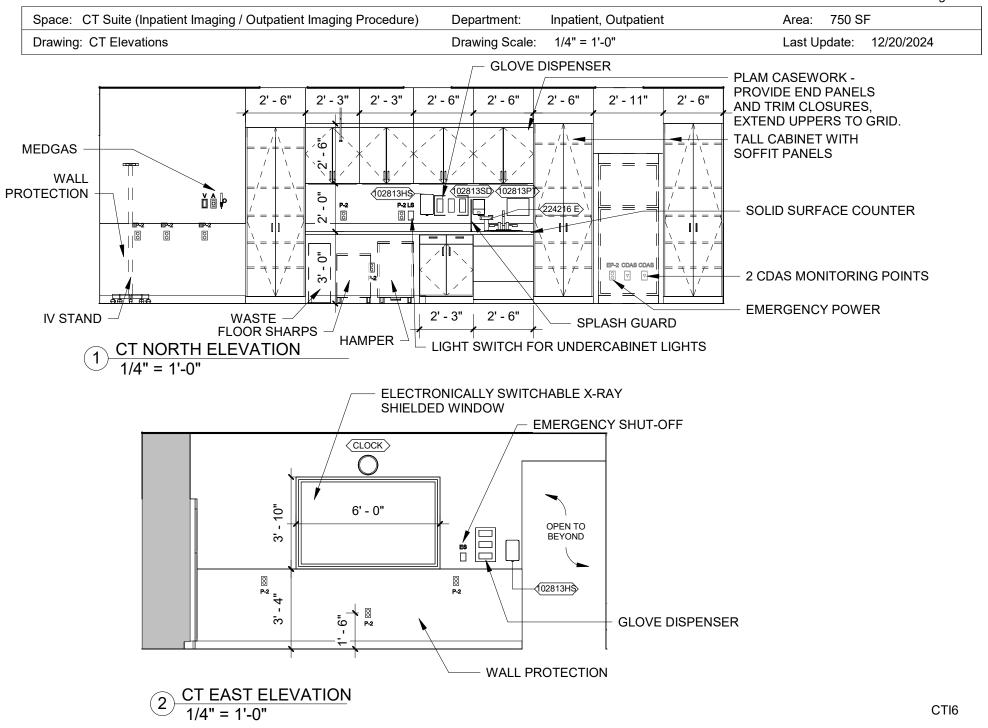

Space Design Guidelines - Basis of Design

Space: CT Suite (Inpatient Imaging / Outpatient Imaging Procedure)	Department:	Inpatient, Outpatient	Area: 750 SF
Drawing: Data/Power Schedule	Drawing Scale:	NTS	Last Update: 12/20/2024

Electrical Fixtures

USTW ID	Item	Qty.
		4
0540		1
CDAS	CDAS Connection	4
EP-2	Emergency Power - Duplex - 120 V	9
P-2	Power - Duplex - 120 V	17
P-4	Power - Quad - 120V	5
SGB	Single gang Box - Card Reader	2

Data Fixtures

UTSW ID	Iten	n Qty	
D-2	Data outlets	1	
D-4	Data outlets	7	

Utility Considerations:

Emergency power required for CT system, host medication dispenser, and warming cabinet. Confirm additional items with user group.

CDAS or monitoring required for host medication dispenser and warming cabinet. Confirm additional items with user group.

Facilities Planning, Design, and Construction

Space Design Guideline Update Log Q4 2024 – Issued December 20, 2024

Bold text indicating new/revised information.

Organization Changes:

New organization of spaces into four groupings, as indicated in Table of Contents.

As part of the organization change, the "Department" designation has been revised in each titleblock.

Section Revision/Addition

I. General Information

Addition: D

D. For healthcare spaces, the A/E shall confirm with UTSW if a project is facility based or non-facility based to identify regulation and licensing requirements.

New Sections:

Healthcare, Outpatient, Cardiac Stress / Echo

Healthcare, Outpatient, CT Suite

Healthcare, Outpatient, CT Suite: Procedure: See Inpatient CT Suite

Healthcare, Inpatient, CT Suite (Inpatient and Outpatient Procedure)

Drawing Updates:

Section Revision/Addition

Nursing Mother's Room (NM) Added door hardware information

Nursing Mother's Room – Individual (NMI) Added door hardware information

Rodent Housing – 4 Rack (RH4) Added exhaust information for ventilated housing and note that dimensions are to indicate placement regularity.

Facilities Planning, Design, and Construction

	k (RF6) Added exhaust information for ventilated housing and note that dimensions are to indicate placement regularity.
Rodent Procedure – Typ	e A (RPA) Added note that dimensions are to indicate placement regularity.
Rodent Procedure – Typ	e B (RPB) Added note that dimensions are to indicate placement regularity.
Audiology Booth (AB)	Revised door requirements, updated component schedule
Blood Draw Bay (BD)	Revised component schedule
Exam (E)	Revised component schedule
Exam – Double Sided (E	X) Revised component schedule
Eye Lane (EL)	Revised component schedule
Procedure Room (P)	Revised component schedule
Procedure Room with To	oilet (PR) Revised component schedule
Ultrasound / Sonogram	(US) Revised component schedule
Reading Room (RR)	Titleblock revisions
Check-In (Cl)	Titleblock revisions
Medication Room (MR)	Titleblock revisions
POC Lab (POC)	Revised component schedule, revised splash guard

Facilities Planning, Design, and Construction

Processing Lab (PL)								
	Revised component schedule							
Instrument Processing	(IP)							
	Revised component schedule							
Soiled Hold (SH)								
	Revised component schedule							
Utility – Clean and Soile	Utility – Clean and Soiled (U)							
	Revised component schedule							

Utility - Clean / Soiled with Pass Through (UP) Wall mounted pass-through comments revised. Revised component schedule
