

Pathology Residents Present at 2024 PPS/SPP Joint Fall Meeting

The joint meeting of the European Paediatric Pathology Society (PPS) and the North American Society for Pediatric Pathology (SPP) was held in Dublin, Ireland, September 12-14, 2024.

In addition to the regular education program, there were 70 abstracts accepted for poster or oral presentations from across Europe and North America. Of these 70, six abstracts were from the UT Southwestern/Children's Health Division of Pediatric Pathology.

Pathology residents, under the mentorship of pediatric pathology faculty, put together the following abstracts (and the respective final presentations):

#1. Chiari iii malformation: an autopsy approach and findings. Spencer Cope, Luis Mosquera Gomez, Heather Blakley, Charles Timmons, Veena Rajaram.

#2. Granulomatous deciduitis: a rare pathologic diagnosis of unknown etiology. Cecilia Dusek, Charles Timmons, Dinesh Rakheja.

#3. A case of overlapping syndromes in perinatal autopsy: amniotic band sequence, limb-body wall complex, or body stalk anomaly? Nikitha N Samy, Anita Sengupta, Veena Rajaram.

#4. Fibrous hamartoma of infancy diagnosed by next generation sequencing of a core biopsy. Ginna Hernandez Velasquez, Charles Timmons, Dinesh Rakheja.

#5: A pediatric glioneuronal tumor harboring FAM131B::BRAF fusion demonstrating diverse histologic morphologies previously reported as separate entities. Luis Mosquera Gomez, Charles Timmons, Veena Rajaram.

#6. Clinical practice of reinterpreting previously reported clinical exome tests. Luis Mosquera Gomez, Shirelle Barnes, Hong Chen, Garrett Gotway, Jason Park.

Attendees make time to refuel and recharge.
