

## Zhang Named USCAP Ambassador

Third year resident Bo Zhang, M.D., has been approved to the USCAP Ambassador Program.

Ambassadors are essential advocates for USCAP, promoting the benefits of joining the practicing pathology community and inspiring medical students to pursue careers in the specialty. With aims to connect with the next generation of pathologists, the program highlights the transition of committed pathologists-in-training into leadership roles as they mature professionally.

With the support of UTSW Pathology Residency Director, Dr. James Burner, and because of his active participation in USCAP, Dr. Zhang will begin his two-year term in February 2025. The Ambassadors will provide guidance and orientation to trainees, first-time attendees, and Global Partner Award Recipients at the Annual Meeting in Boston next March.
