

Postdoctoral Scholar Openings in the Wang Lab, Department of Radiation Oncology

Multiple postdoctoral training positions are available in the laboratory of Professor Andrew Wang, M.D. in the Department of Radiation Oncology at the University of Texas Southwestern Medical Center.

Dr. Wang's laboratory research is focused on the development of novel cancer diagnostics and therapeutics. Our entire research program spans from preclinical development to early phase clinical trials and translational research. Current openings are within the cancer Nanomedicine team and the cancer metastasis modeling team. We are looking for motivated researchers to develop new Nanomedicine-based treatment for kidney cancer as well as to further develop a model system that can help understand cancer metastasis tropism.

Applicants with a Ph.D. or M.D./Ph.D. and a strong background in biomedical engineering, and/or chemistry and/or cancer biology with a strong interest in translational research are encouraged to apply. A track record of productivity with publications in well-established journals will be valued.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Interested individuals should send a CV, statement of interests, and a list of at least two references (email preferred) to:

Andrew Z. Wang, M.D.
A.Kenneth Pye Professorship in Cancer Research
Professor of Radiation Oncology with Tenure
Vice Chair of Translational Research and Commercialization
Department of Radiation Oncology
