

3rd Annual Simulation-Based Quality Improvement and Research Forum

SAVE THE DATE

Wednesday, May 13, 2020

Hosted by the UT Southwestern Simulation Center

Keynote Address 7–8 a.m.

Panel Discussion / Research Presentations 8 a.m.–Noon

Experiential Learning 1:30–4 p.m.

UT Southwestern
Simulation Center

3rd Annual Simulation-Based Quality Improvement and Research Forum

Keynote address by:
Diane B. Wayne, M.D.

Diane B. Wayne, M.D., is Vice Dean for Education, the Dr. John Sherman Appleman Professor of Medicine at Northwestern University Feinberg School of Medicine, Chair of the Department of Medical Education, and President of the McGaw Medical Center of Northwestern University. Dr. Wayne's research focuses on the intersection of education and patient care quality with expertise in simulation-based research. Her team has shown that high-quality education leads to improved clinical skills, reduced iatrogenic complications, and lower hospital costs than traditional approaches. She has published extensively in *Academic Medicine*, the *American Journal of Medical Quality*, the *Archives of Internal Medicine*, *Critical Care Medicine*, and *CHEST*.

CALL FOR ABSTRACTS

Submission deadline extended to February 28, 2020.

Students, residents, fellows, faculty members, scientists, and other interested individuals are invited to submit abstracts for the UT Southwestern Simulation Center Quality Improvement and Research Forum. This forum is intended to bring together individuals from a broad array of backgrounds, all with a common interest in health care simulation quality improvement and research. Abstracts may be submitted for any project investigating simulation-based activities related to medicine, medical science, medical education, and patient safety.

Work that has been previously presented or published is welcome in this forum.

ABSTRACT SUBMISSION

There will be poster and oral presentations. Submissions will be accepted until
February 28, 2020.
